**Detailed Description**

... provided only after other necessary first components are in place may be distinguished from the primary components by having indicia coding unique with respect to the indicia coding of the first... across future releases? The biggest danger in using packaged components is that the vendor will make changes to the component interfaces. When selecting packaged components make sure the vendor guarantees backwards compatibility...addition to the standard construction components, a new set of utilities exist which can help increase the quality of code generated by developers. QA Utilities verify the quality of constructed code...and expected costs of training new team members are reduced.

If the application does not change, repeating the tests yields the same results every time, given the same baseline databases. To remain repeatable, a test model must be maintained to reflect changes made to the application (fixes, isolated enhancements, new releases, and so on).

To ensure the...
